EC standard

EXPORT REFERENT

Name: Christophe CHALER

Tel.: (+687) 28 36 20

Email: sema@sema.nc

Created 40 years ago, SEMA specializes in the sector of layout, from private to the professionals, and for some years, in the hotel sector. Among its references are the "Le Méridien" in Nouméa, the "Pacifik Appartiel" in Koné, the "Koulnoué" in Hienghène or the "Malabou" in POUM, but also the "Gallery" of Dumbéa Mall.

Settled in the premises at Zac Panda, the company is established on a surface of 1,150 m² and employs ten persons. This surface is an asset for SEMA in that it can use machines at full speed while storing part of its production, with a more linear renovated production line.

SEMA is equipped with three digital controls, including a «5 axis» position which gives the possibility to make parts in 3 Ds. The «3 axis» machines, standard and vertical, allow it to manufacture all shapes and sizes up to 4 m x 2.10 m. A PVC field Bander completes the whole. Stratified blocks and stratified custom panels are imported from Europe as well as the hardware. The furniture is assembled in the factory for more quality finishes.

The company has a Design Office for personalized advice and tailored to each case.

As part of its export development, SEMA wishes to offer its expertise to architects, administrations and hotels in the Pacific, Wallis and Futuna, Vanuatu, Papua New Guinea and French Polynesia. It can export ready-assembled furniture in containers, or send them in kits and work with local partners for assembly.
